CONCLUSION :

Today we have seen that party system and political parties are increasing their party members because their motive is to loose the opposition party members. They do not work for the people and the nation. They work for their own benefits. They are only enjoying the benefits that are given from the constitution of that nation. Their only aim is to work for their own properties. We have also seen that most of the political members are corrupted, Nepotism, bribery, Extortion and patronage. Political corruption is the abuse of public power, office or

resources by elected government officials or personal gain, by Extortion, soliciting or offering bribes. Political corruption is the use of power by government officials or their network contacts by illegitimate private gain. Party members do not work for the party they work only because their motive is to only how we can take benefit from the party.
